BALANCEÈ SMARTPUMP · ANDROID SCREEN SPEC

Every screen. *Every state. Every flow.*

Complete visual specification for Ekomobong. All 5 transaction flows, all pump display states, all attendant UI actions. Build exactly what you see here.

Idle + Mode Select

Flow 1 — Fixed Pre-pay

Flow 2 — Fill-up Cash

Flow 3 — Fill-up Digi

FLOW 1 · DIGITAL PRE-PAY

Fixed amount, *pay before fuel flows.*

Customer selects amount and payment method. System waits for payment confirmation. Relay closes on webhook. Counts to target. Opens. Done. The cleanest flow.

SCREEN SEQUENCE — CUSTOMER-SIDE

Flow 1 — webhook payload and relay logic

```
POST /pump/authorise
{
  "mode": "fixed",
  "amount_naira": 5000,
  "litres_authorised": 5.75,
  "transaction_id": "BLC-00847",
  "nozzle_id": "1",
  "price_per_litre": 870
}
```

On receipt: set state = DISPENSING, close relay, start counting. Open relay when pulse count reaches litres_authorised. QR expiry: if no webhook received within 5 minutes, cancel transaction and return to idle. Do not leave relay in any state other than OPEN when idle.

V1 REQUIRED — this is the primary flow
